

RAJAT KHANNA

Product Leadership | Enterprise SaaS | Platform Strategy & Growth

New Delhi, India | +91-98718-33461 | rjtkhanna@gmail.com | linkedin.com/in/rjtkhanna

EXECUTIVE SUMMARY

Product leader with 14+ years across engineering, product management and product leadership in enterprise SaaS, EdTech, healthcare and market intelligence. Currently lead product for a global college and career readiness SaaS platform serving 1,200+ schools across 70+ countries, partnering with Sales on a portfolio underpinning \$5M+ ARR and 80%+ partner retention. Manage product managers and their teams; own product budget, annual targets and ARR contribution planning. Previously Assistant Vice President at WNS Global Services, owning a \$2M revenue line across six US and EU pharmaceutical enterprises.

CORE COMPETENCIES

Product Strategy and Vision • Enterprise SaaS • Budget and Annual Target Ownership • ARR Growth and Retention • Platform Modernization • Product-Led Growth • Go-to-Market and Commercialization • Product Discovery • Product Analytics and Experimentation • Product Operating Model • Customer Experience • Workflow Automation • AI and Generative AI Products • Team Building and Managing Managers • Executive Stakeholder Management • Cross-Functional Leadership

PROFESSIONAL EXPERIENCE

Associate Director of Product

Cialfo | Delhi, India | Jun 2022 – Present

Scope: Global college and career readiness SaaS platform serving 1,200+ schools across 70+ countries. Manage product managers and their teams ([N] direct reports, [N] total). Own product budget, annual targets and ARR contribution planning across AI, platform, analytics and growth.

- Partner with Sales on a product portfolio underpinning \$5M+ ARR of \$[X]M company ARR, supporting 80%+ partner retention across 1,200+ schools in 70+ countries.
- Grew feature adoption from 45% to 75% and self-service onboarding completion from 20% to 60%, reducing implementation dependency on Customer Success and shortening time to first value.
- Raised NPS from 42 to 64 and cut application turnaround from 3 days to under 1 day by rebuilding the counsellor workflow around automated task routing, prioritised worklists and AI-assisted drafting.
- Led platform modernization and integration strategy, contributing to 35% year-over-year DAU growth.
- Built and shipped the company's AI product portfolio from zero, reaching 60% AI feature adoption among active counsellors.
- Established a data-driven product operating model — instrumented adoption metrics, structured experimentation and outcome gating before roll-out — replacing feature-count roadmaps with measured outcomes.
- Own the product-side data and AI compliance posture for a platform handling minor student records across 70+ jurisdictions (FERPA, COPPA, GDPR, DPDP), a standing requirement in institutional procurement and security review.
- Align Engineering, Design, Customer Success, Sales and executive leadership on quarterly priorities, trade-offs and investment decisions.

Selected Product Portfolio

- Counsellor Intelligence Hub — AI workspace surfacing recommendations, priorities, communications, tasks and insights inside the counsellor's daily workflow.
- AI Productivity Toolkit — generative workflows for recommendation letters, student profiling, session notes and parent communications, with human review before any record is committed.
- Curriculum Intelligence Platform — AI-assisted curriculum planning for personalised school guidance programmes.
- Student Personalization Engine — behaviour-driven recommendations and intelligent nudges to lift student engagement.

Assistant Vice President, Product Development

WNS Global Services | Noida, India | Jun 2016 – Jun 2022

Scope: Owned a \$2M revenue line across Competitive Intelligence, Market Intelligence and Commercial Analytics for six enterprise pharmaceutical clients in the US and EU. Managed product managers and their teams ([N] direct reports, [N] total).

- Owned a \$2M enterprise revenue line end to end — product strategy, roadmap, commercialization and renewal — across six US and EU pharmaceutical accounts.
- Lifted platform engagement 20% by attaching intelligence output to decisions clients were already accountable for — incentive compensation, customer planning and forecasting — rather than shipping standalone dashboards.
- Led customer discovery and go-to-market for [product name], converting analyst-delivered research into a recurring software revenue line.
- Built executive reporting capabilities that made competitive intelligence a standing input to client commercial planning cycles.
- Hired, developed and managed product managers; established discovery, requirements and release practice across three product lines.
- Strengthened technology partnerships underpinning data acquisition and analytics delivery.

Team Lead, Technology

CollegeSearch | Gurgaon, India | Jul 2013 – Jun 2016

- Led product delivery and platform architecture for a higher-education discovery and admissions platform serving Indian students and institutions.
- Built and mentored the engineering team, improving release predictability and reducing defects escaping into production.

Associate Consultant

Oracle Financial Services Software | Bengaluru, India | Sep 2011 – Jun 2013

- Delivered enterprise banking software enhancements and supported core platform migrations for regulated financial institutions, working to reconciliation and audit standards where a data error is an incident rather than a defect.

EDUCATION

- Executive MBA — Faculty of Management Studies, University of Delhi | 2024 – 2026
- Advanced Programme in Data Sciences & Business Analytics — IIM Calcutta | 2018 – 2019
- B.Tech — Netaji Subhas Institute of Technology, University of Delhi | 2007 – 2011

TECHNOLOGY

Product Analytics: Mixpanel • GA4 • SQL | AI: Generative AI • Large Language Models • AI Agents • Retrieval-Augmented Generation (RAG) • Prompt Engineering • Model Evaluation • Guardrails • OpenAI • Azure OpenAI • Anthropic Claude • Google Gemini | Platform: REST APIs • OAuth | Tooling: Jira • Confluence • Figma • Miro • Notion
