EXECUTIVE SUMMARY

14+ years of progressive experience across engineering, product management, and business leadership, building and scaling technology products across EdTech, Healthcare, and BFSI.

Currently leading product strategy at **Manifest Global**, shaping a global platform serving 1,200+ schools across 70+ countries, with responsibility for \$5M+ ARR and products supporting 80%+ partner retention.

Translating business strategy and customer needs into compelling product vision and roadmaps, while leading cross-functional teams and Go-to-Market to deliver measurable customer and business outcomes.

KEY ACHIEVEMENTS

Scaled Flow AI – Application processing platform to **450+ partners**, transforming Australian university application workflows.

Drove **Cialfo DAU/MAU** from 15% → 53%, **AI adoption** to 60%, and **Self-service onboarding** from 20% → 60%.

Raised **NPS from 25 → 60** through continuous customer feedback loops.

Optimised **application turnaround from 3 days to <1 day**, driving significant productivity and partner experience gains.

Built product leadership capability through coaching, hiring, career development and portfolio ownership.

PROFESSIONAL EXPERIENCE

Cialfo, Manifest Global (2022–Present)

Associate Director of Product

Leading Cialfo's K12 AI product strategy and transformation agenda, embedding intelligence across the student, counselor, and application lifecycle to accelerate adoption, retention, ACV expansion, and market entry. Currently mentoring a team of Product Managers across AI, platform, and workflow products.

Led and mentored a team of Product Managers across AI, platform, and workflow products. AI-native products and agentic workflows including CoWork, Saige AI, Intelligent Recommendations, and Flow AI, combining LLMs, RAG, and multi-agent/sub-agent orchestration to automate high-friction workflows and unlock productivity and operational leverage.

Institutionalized an AI product operating model spanning use-case discovery, experimentation, prompt engineering, evaluation, analytics, and continuous optimization, shifting the organization from feature delivery to measurable AI-driven business outcomes.

PORTFOLIO

Co-Work

AI-powered counselor workspace orchestrating recommendations, priorities, communications, tasks, and insights.

Cialfo Charter

AI-first UX and product governance framework driving accessibility, consistency, and experience quality.

Flow AI

Multi-agent and sub-agent orchestration platform automating application workflows for Australian universities.

Saige AI

Behavior-driven student discovery and application agent delivering personalized, guided assistance.

Manifest Intelligence

Actionable product intelligence driving adoption, productivity, and operational optimization.

MI CRM

Global CRM customised for external vendors to process student applications for multiple destinations

Vision & Portfolio Leadership
Enterprise SaaS
Platform Modernisation & Automation
Commercial Partnership & Growth
Analytics & Experimentation

TECHNOLOGY

AI & LLMs:

AI Agents and Agentic Workflows
Multi/Sub Agent Orchestration
RAG and Prompt Engineering
Generative AI, Prototyping, AI
Evaluation Data & Analytics

Product Management:

Discovery & Roadmapping, A/B
Testing, Experimentation, Confluence,
Figma, Miro, ProductBoard, Amplitude,
MixPanel

Data & Technology:

BI, SQL, REST APIs, OAuth, GA4, Data
Analytics, Workflow Automation

WNS Global Services (2016 – 2022)

Assistant Vice President – Product Development

Led enterprise product strategy across Competitive Intelligence, Market Intelligence, and Commercial Analytics platforms, aligning product investments with business growth priorities.

Increased platform engagement by 20% through data-driven product optimisation and customer-led experience improvements.

Led customer discovery, commercialization, and go-to-market strategy, translating market opportunities into scalable product offerings.

Setup enterprise analytics and intelligence platforms, translating complex data into decisioning, insights and commercial workflows.

CollegeSearch (2013 – 2016)

Team Lead, Technology

Led product delivery and platform architecture for a higher education technology platform, translating business requirements into scalable product and technology solutions.

Strengthened engineering execution and delivery practices, mentoring cross-functional development teams and establishing a foundation for scalable product growth.

Oracle Financial Services Software (2011 – 2013)

Associate Consultant

Delivered enterprise banking platforms and software solutions for global financial institutions including World Bank, American Express, and Citi, supporting complex BFSI workflows and business-critical applications.

Led core application development and platform migration initiatives, delivering scalable solutions across enterprise banking environments.
